Estimated Volume of Excavation/Fill: _____ CY Disturbed Area: _____ Ac. Start Date: _____

ALL WORK SHALL COMPLY WITH CURRENT TOWN OF FREDERICK DESIGN STANDARDS AND CONSTRUCTION SPECIFICATIONS AND TOWN'S LAND USE AND MUNICIPAL CODES

PERMIT CONDITIONS

1. Plan review and grading permit will be valid for a maximum of one year.
2. If grading is in excess of 5,000 CY, consult additional requirements in Appendix J of the International Building Code.
3. No construction debris will be allowed in the fill. All existing debris on site will be stockpiled separately for removal.
4. Erosion control measures must be installed and maintained as shown on the approved erosion control plans.
5. Erosion control measures must be inspected and accepted by the Town Construction Inspector prior to release of permit.
6. The Contractor shall insure operations are executed in a manner which will minimize dust, noise, excessive accumulation of debris, danger to the public, and interference with other construction.
7. No dirt or mud will be left on the streets at the end of each operating day. No equipment will be allowed to be loaded or parked on any paved roadway.
8. Owner/Contractor shall conform to requirements of the construction Stormwater Permit.
9. Owner/Contractor shall comply with all Frederick, State, and Federal environmental laws. All wetlands shall be protected by construction fencing during grading.
10. Owner/Contractor requesting permit shall verify by submitting the permit that they have visited the site and there is no wildlife existing on site. A field visit with Frederick following the Preconstruction Meeting is required.
11. If environmental or wildlife issues were identified for the site with issues to be resolved before construction, the Owner/Developer shall provide a letter from the Environmental Consultant that the issues have been resolved not more than 20 days prior to the anticipated start date of construction.

I hereby state that the above information is correct and agree to comply with all Town, State, and Federal regulations that govern this project.

When required: A grading permit shall be required as specified in Appendix J of the International Building Code including the following.

1. Two sets of plans showing: vicinity map, property limits, accurate contours, detailed plans of all surface and subsurface drainage devices, finish contours, erosion control plans and details.
2. Drainage Report
3. Final Geotechnical Report including earthen cut/fill analysis and construction procedure, and over-excavation recommendations and construction procedure.
4. Wildlife and environmental assessment report. See Permit Condition 11 below if wildlife or environmental issues have been identified.
5. Copy of Construction Stormwater Permit from the Colorado Department of Public Health and Environment (if required).
6. Copy of all other applicable Federal and State Permits.
