400K and over					\$0.78

**Section 13-74.(c).(3)**

The above rates assume that raw water will be delivered to a storage reservoir on the user’s property and the user will have their own pump station for their irrigation system. If direct pressurized flow is delivered to the user’s irrigation system from the Town’s delivery infrastructure then there would be added twenty cents (\$0.20) per one thousand (1,000) gallons of monthly usage in addition to the costs above. In addition, there will be an additional rate of seventy cents (\$0.70) per one thousand (1,000) gallons used added for areas that have not provided water shares to the Town to cover the projected raw water needs, based on a calculation of two and one-half (2.5) acre-feet per acre of irrigated area or a detailed engineering study accepted by the Town.

**Section 13-74.(c).(4)**

The monthly service charge per tap for services located outside of the Town limits is the same as the rates in Subsections (c)(1), (2), and (3) of this Section except that the monthly base rate for the tap size would be double the rate shown for the same size tap within the Town limits. Service extended outside of Town limits must be approved by the Board of Trustees per Section 13.67 of this Code.
